DETAILED ACTION

Allowable Subject Matter

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior art fails to teach or suggest a process for transmitting data on a bus, minimizing switching activity on the bus itself, the process involving conversion of the data between a first format and a second format, the process comprising: converting between the first format and the second format by swapping of position of respective bits within a cluster having a given number of bits, the swapping being implementable according to a plurality of different variants, a maximum number of the variants being equal to a factorial value of the given number, each of the variants being identified by a respective swap pattern as called for in claims 1, 13, 32 and 36. Therefore, claims 1-40 are presently allowed.

Conclusion
